Reference Letter for Eureka BPO

We were very pleased to work with Eureka BPO. In our business we work with developers from many countries to accomplish client's development and customizations. Sergey and his development team have proven to have a work ethic and professional skills which make our projects successful. It was a pleasure to work with them.

We hired Eureka BPO for an Alfresco customization project. The work included customizing of Alfresco Share and Records Management module. Sergey and his development team were fully qualified for this work and did an excellent job. Throughout the whole project we felt very comfortable working with them. Communication was proactive and very polished. All our questions have been answered very professional and in no time. The milestones have been delivered in the expected quality and time period. We thank Sergey and his team for all the hard work.

Eureka BPO has proven to be an excellent provider for Alfresco development. We can highly recommend Sergey and his team for work in this area and are very pleased to continue our business relationship. In case of questions you may contact me on the phone number given above. I'm happy to provide more information.

Sincerely

Dr. Thomas Schlienger
